#### *Consumption-Driven Services*

"Looking back at the year of 2021, we are pleased to announce another concrete milestone during the journey of our business transitions towards China's leading digital personal financial management platform, with our revenue structure further diversifying and our business volume and profitability resuming to a healthy growth rate post the restructuring, meeting our previous guidance for both wealth management and credit-tech business lines," said Mr. Ning Tang, Chairman and Chief Executive Officer of Yiren Digital.

"On wealth management, the growth momentum remains strong with contribution to our total net revenue reaching more than 35% in the fourth quarter of 2021, a historical high. Specially, our total client asset reached RMB19.3 billion as of December 31, 2021, representing an increase of 11% compared to the end of prior quarter. Notably, total investor base on Yiren Wealth platform saw an accelerated growth due to our Yiren Select initiative. In the fourth quarter of 2021, the number of new investors on Yiren Wealth increased by 22% on a quarter-over-quarter basis and the number of investors who held at least two different asset classes grew by 15% compared with the third quarter of 2021. Moreover, our insurance brokerage business has been growing at a higher-than-expected rate with total premiums reaching RMB888 million in the fourth quarter of 2021, representing a 21% quarterly growth, which is a sharp contrast to the overall industry downside cycle."

"On credit-tech we have seen a visible evolvement in our overall loan portfolio as we continue to optimize our product mix and shift towards higher credit quality customer segments, moving in full swing towards guided APR with stable unit economics. Currently, 99% of our new loans facilitated are small revolving loans and SME loans, compared to 71% in the year of 2021, leading to a shorter-tenor portfolio with lower operating and credit costs, which is more flexible to adjust to external environment. Moreover, our e-commerce platform launched in August 2021, has started to contribute revenue with rapid growth, effectively driving up our user activities and establishing a more diversified finance consumption ecosystem."

"The year of 2021 ended with strong earnings. Excluding one-time business disposal expense incurred in the fourth quarter of 2020, total net income for the year of 2021 was more than RMB1.0 billion, compared to a loss of RMB36.9 million in 2020, beating our internal target with fast business recovery and optimized operational efficiency," said Ms. Na Mei, Chief Financial Officer of Yiren Digital. "On the balance sheet side, our cash position grows stronger with RMB3.0 billion cash and short-term investment as of December 31, 2021, an increase of 17% compared with the end of the last quarter, providing sufficient fuel for any further business expansion that we may have in the future."

### **Non-GAAP Financial Measures**

In evaluating the business, the Company considers and uses several non-GAAP financial measures, such as adjusted EBITDA and adjusted EBITDA margin as supplemental measures to review and assess operating performance. We believe these non-GAAP measures provide useful information about our core operating results, enhance the overall understanding of our past performance and prospects and allow for greater visibility with respect to key metrics used by our management in our financial and operational decision-making. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The non-GAAP financial measures have limitations as analytical tools. Other companies, including peer companies in the industry, may calculate these non-GAAP measures differently, which may reduce their usefulness as a comparative measure. The Company compensates for these limitations by reconciling the non-GAAP financial measures to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating our performance. See "Operating Highlights and Reconciliation of GAAP to Non-GAAP measures" at the end of this press release.
